

# Floating Pump Station and Piping

CAPE PRESTON, WESTERN AUSTRALIA

## PROJECT OVERVIEW

**CLIENT:** CITIC Pacific Mining  
**ENVIRONMENT:** Brownfield

G&S Engineering were awarded the optimisation works to increase the water supply rate at the concentrator raw water dam. This included the installation of two floating pontoon pumping stations and 500 meters of 630mm HDPE pipeline including concrete pipe stands and associated structural, mechanical, piping and electrical works along with pressure and weld testing and commissioning.
